# HR Information System (HRIS)

### HR Management

In WCO (WHO India Country Office), employees work under different contract mechanisms. Some are on short-term (project based) contracts and some are on long-term contract mechanism termed as Staff (Temporary, Fixed Term contracts) and other short-term contracts are called Special Service Agreement (SSA) which can be of any duration but to a maximum of 12 months. Staff contracts are as per positions defined in the HR plan, however SSA contracts are renewed on yearly basis based on funding, project needs and individual performance and contract start dates need not necessarily be beginning of a calendar year. WCO has been managing the HR activities related to Staff and SSAs using a collection of legacy standalone and online applications, Excel sheets and manual systems. WCO has now implemented an online application from end-to-end management of HR activities and payroll process.

### Payroll Management

WCO has been using an Excel based system for managing its payroll. A new online application has now been created for an end-to-end workflow system for Payroll Management integrated tightly with HR Information System.

Broadly speaking, the functional modules of HR Information System and Payroll for the SSAs are the following:

a) Issuance of New SSAs (On Boarding)
b) Renewals of Existing SSAs
c) Addendums (Relocation, Promotion etc.)
d) Separation (Full and Final Settlement)
e) Employee Requests and Self Service
f) Performance Management
g) Leave Management and Approvals
h) Leave Encashment
i) Payroll Processing
j) Document Management

**Actors**

The following table details the actors relevant to the use cases in this document.

| Ref | Actor Name | Actor Privileges |
|---|---|---|
| 1 | SSA Holder | SSA holder receives the electronic copy of SSA and amendments. They can also raise requests to HR through Self Service module. SSA holders can apply for leave through Leave Managament Module. |
| 2 | HR | Initiates renewal and issue of new SSAs. HR has a role at various stages of SSA processing. HR also initiates the monthly payroll process and controls the associated work flow. HR also initiates and processes Full and Final Settlement. HR has approval and verifier role in Leave Encashment. |
| 3 | RAFO/RTL | RAFO verifies each SSA related request such as renewal and issuance for his/her region. RAFO also acts as a first level reviewer of monthly payroll. After RAFO's review all requests are approved by RTL for a particular region. RAFO initiates Leave Encashment process. |
| 4 | DTL/TL/AO/DWR/WR | These are the approvers for various operations related to SSA holders such as SSA renewal, new SSA, Leave etc. |
| 5 | BFU/Finance | Finance has approval and verifier role in various workflows and is the final recipient of the monthly payroll statement |

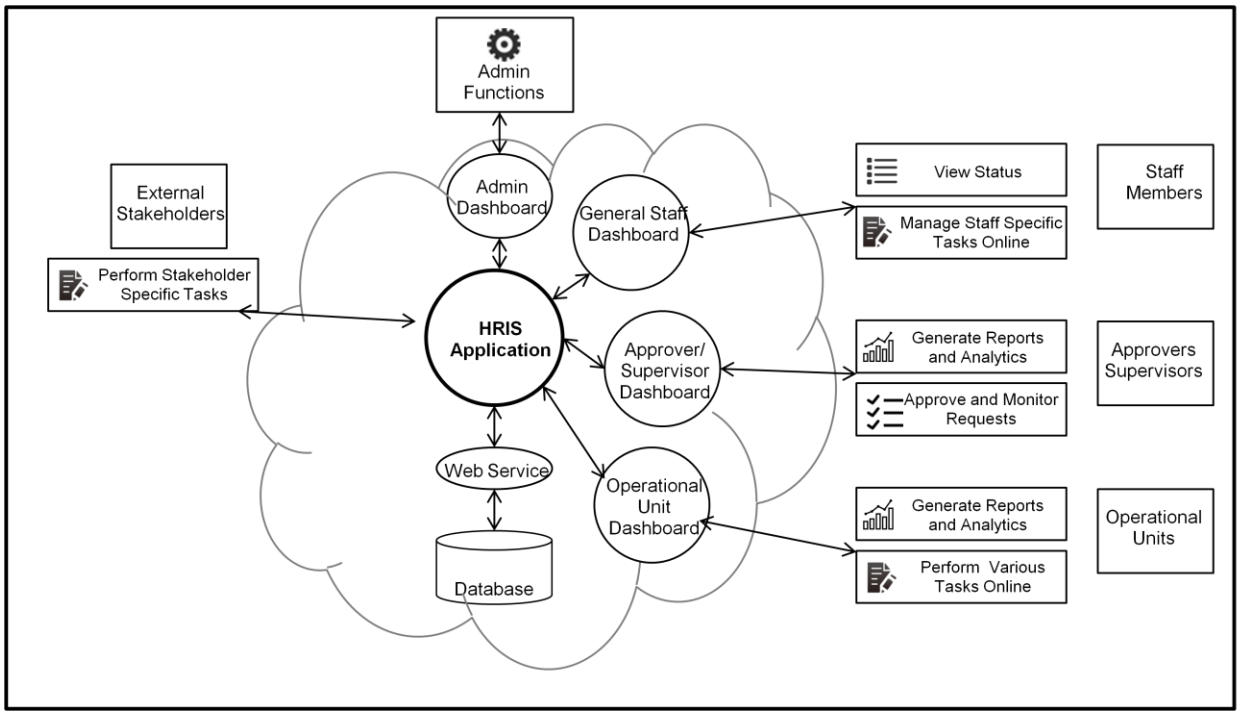

# Technology Stack and Architecture

Operating System: Windows Server 2016

Development Tools: ASP .Net WebForms Framework 4.5

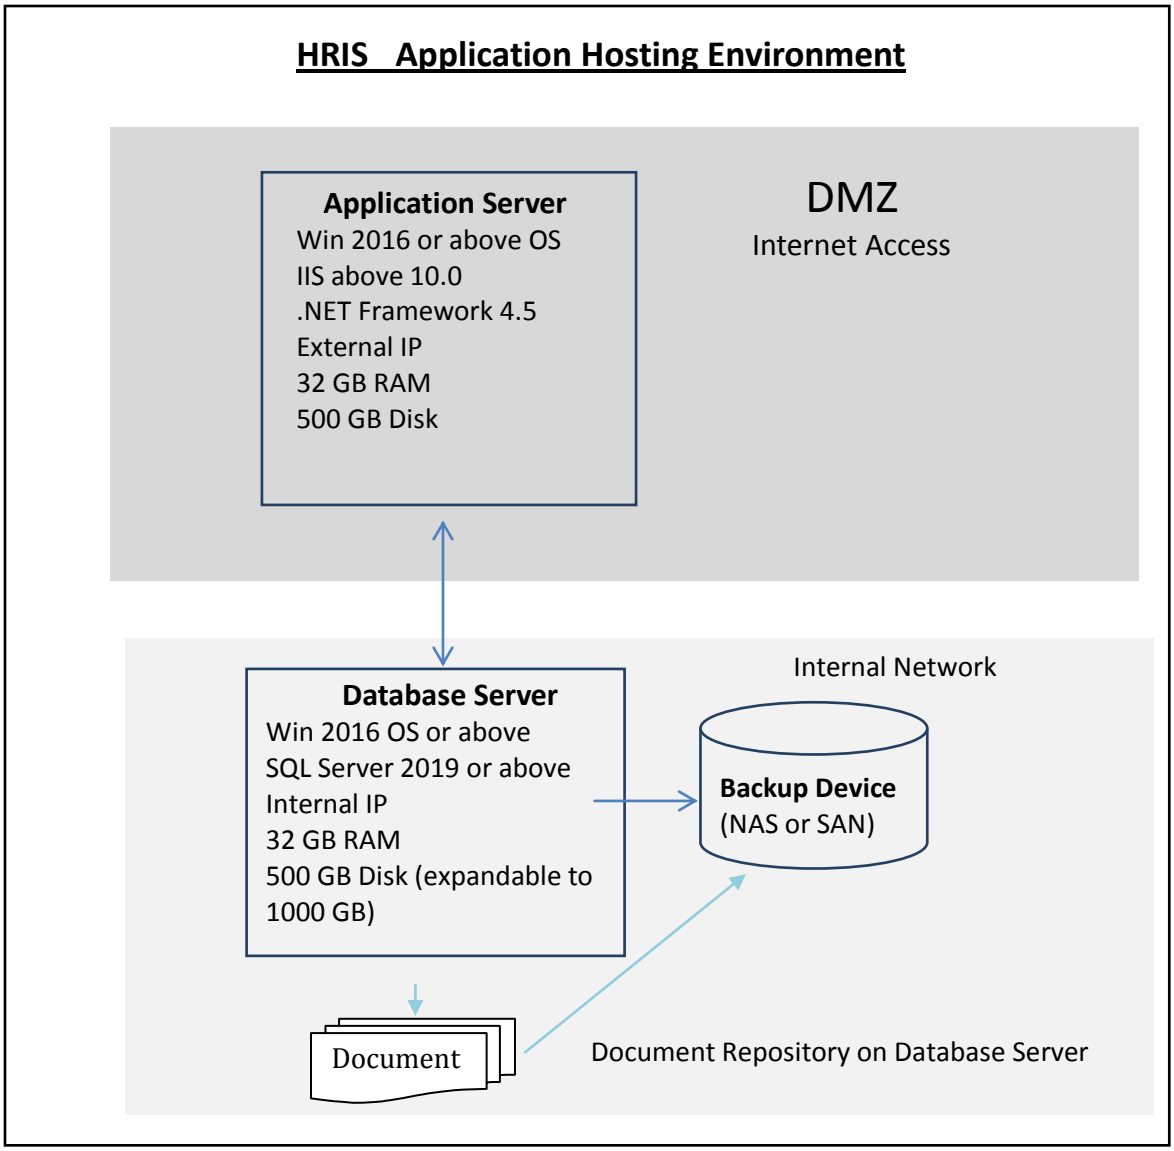

Database: SQL Server 2019

UI: Telerik UI for ASP .Net/Ajax 2014.3.1209.35

## Deployment Process

1. Take a backup of existing databse.
2. Run the query on data base for data base changes like Stored Procedure, Function, Tables etc .
3. Go to the C:/inetpub/wwwroot / bin folder and replace the updated file with existing file.
4. Go to the C:/inetpub/wwwroot/Modulefolder (Addendum,Reports,HumanResource…etc in which you want to Change) and replace the .cs and .aspx page with existing page.
5. For new files paste the .cs and .aspx files.
6. Run a full regression test on the application.

**Ports to be opened for http (80), SQL (1433), SMTP (25)**

## User Roles

| | Role Name | | Functions |
|---|---|---|---|
| 1 | **Admin** | | |
| | Administrator | | Manage masters,upload holidays,Manage settings |
| | HR Admin | | Manage masters like, location, position, Steps, Grade,Designations. |
| | Contract Approver | | Approve SSA's Contract |
| | Non-GSM | | |
| | Master Data Read-only | | Can read only masters data |
| 2 | **HRM** | | |
| | Supervisor | | Approve Leave, Approve Leave abalance certification |
| | User | | Apply Leave, Submit Leave Balance Certification,Submit Bank Details. use Self Services |
| | AO | | Contract Approver, Addendum Approver |
| | WR | | Contract Approver,Addendum Approver |
| | **RTL** | | Endorse Leave Encashment,Approve Leave,Approve SSA Renewal |
| | | RTL Bihar | |
| | | RTL East | |

| | Travel Manager | | |

# Workflow Description

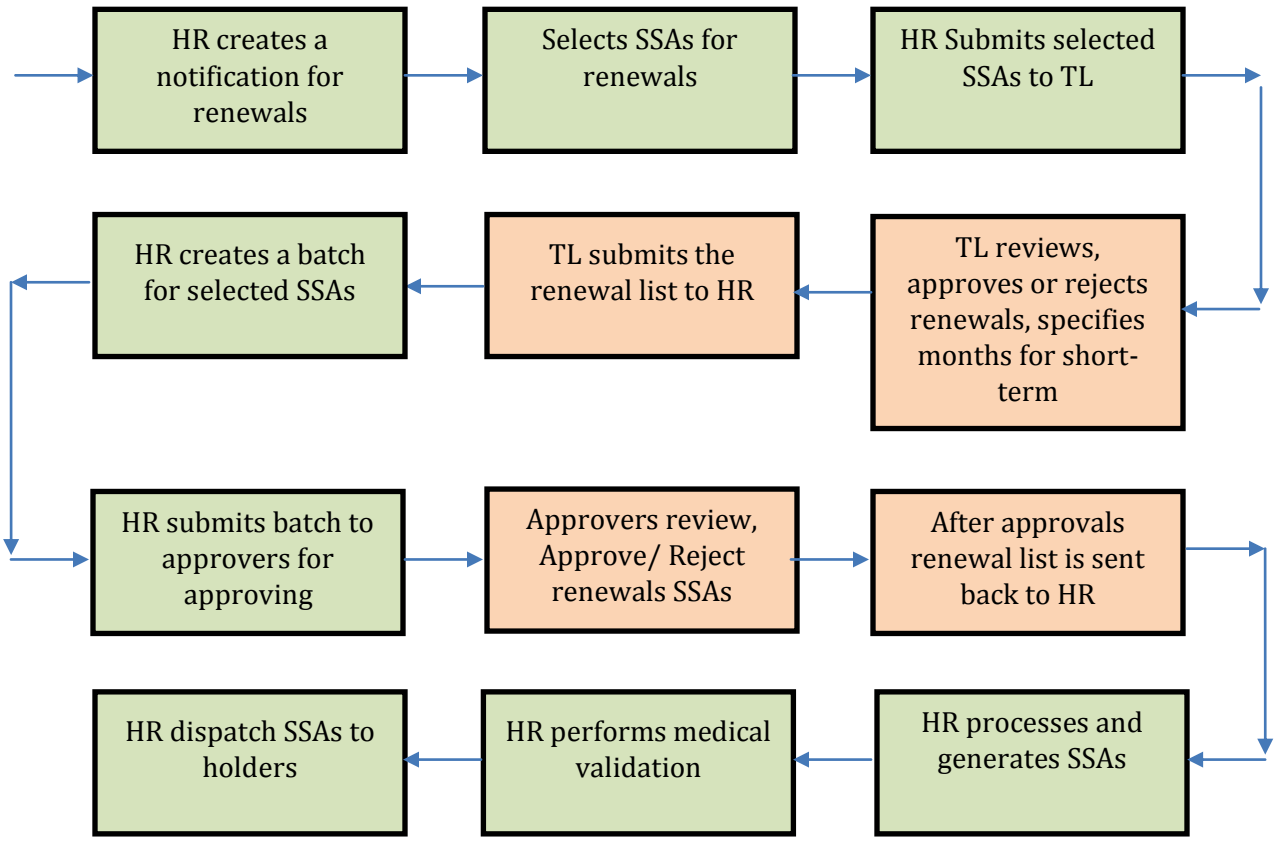

## SSA Renewal

SSA contracts are renewed on yearly basis based on funding, project needs and individual performance. The contract start dates need not necessarily be beginning of a calendar year, though a majority of SSAs are based on a calendar year (Jan to Dec). The renewal process is started few months before the expiry as it involves a complex work flow with a need for authorizations at various stages. There is also an interaction with the insurance company for the validation of medical insurance coverage. There are also some variations in the renewal process for field, NPSU and WCO SSA holders.

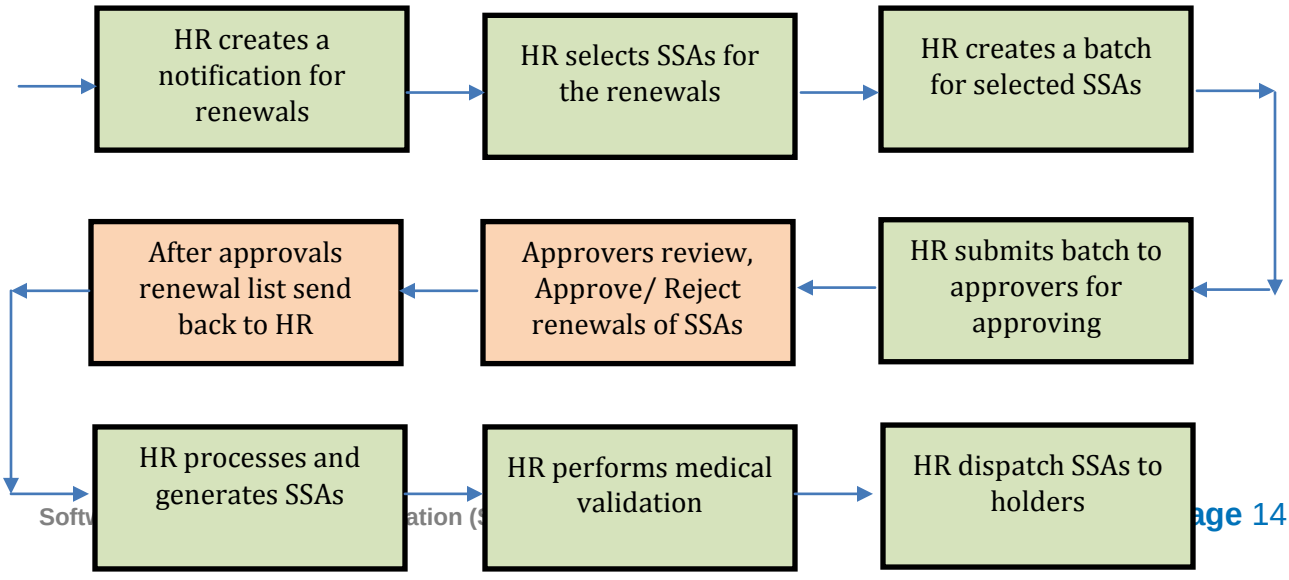

**Work Flow for SSA Renewal for Field SSA Holders**

**Work Flow for SSA Renewal for NPSU SSA Holders**

**Work Flow for SSA Renewal for WCO SSA Holders**

## Work Flow System Requirements

1. A link will be created in the menu in HRIS under Human Resources to provide access to SSA Renewals.
2. The renewal process will be initiated by HR assistant.
3. A notification will be created for renewal process. For notification the information to be provided will include SSA Generation Date, Office (Field, NPSU and WCO) and Comments.
4. After Save, the application will generate Notification number as YYYY/NNNNN (NNNNN is an auto-increment number). It will also record Date of Notification.
5. All saved notifications will be displayed in a grid with columns for Notification No, Notification date, Comments, No. of SSAs, Office Type, Action.
6. On clicking the edit button, a page will open that will show the details of notification in read-only mode. If notification has no SSA then user can edit record of particular notification.
7. On clicking the open button, a screen will open that shows the workflow of renewal process. Tabs are Notification, RTL Response, Batch Processing, Approval, SSA Preparation, Medical Validation, SSA Dispatch.

**NPSU and Field**

8. In New Page, there will be a search option for searching on region and renewal status.
9. After selecting record and clicking on send notification button, SSA's will go for approving process of their RAFO/RTL and they will get email notification. In a notification, there can be one or more region SSA's. On HR assistance screen, there will be a table that reflects the status of approval region wise. Table fields are region, number of notifications sent, number of responses received, number of renewals, number of renewal for short term, number of non-renewals, number of pending and number of elapsed days.

   In case of NPSU, process will slightly change. In case of field, notification will go to RAFO/RTL first and in case of NPSU notification will go to TL.

10. After logging in as RAFO and clicking on Human Resource menu and then on SSA Renewal, notification grid will appear on the screen. On clicking Open button, SSA's of their region/unit will be reflected on the page. Now RAFO can select record whether they want to approve or not. They can add comment on this and there will also be an option of contract duration which is

either short term or full term. If it is short term then RAFO will have to enter months in text box then save the details.

11. After logging in with RTL and clicking on Human resources menu and then on SSA Renewal, a notification grid will appear on the screen. On clicking the Open button, SSA's of their region/unit will be reflecting on page. Now RTL can review the information entered by RAFO. After making changes, if required RTL will submit the SSA's to the HR Assistance by clicking on Submit button. After submitting record, RAFO/RTL cannot edit record. Record will open in view only mode.
12. Now HR Assistance will get mail notification that RTL has approved some renewals. He/she will login and open the same notification. Status table will also show statistics of Renewal. Then HR will have to create a batch of approved SSA's and send that batch for approval process. When batch is created it is reflected in batch grid. On clicking the submit button batch will go to the DTL and email notification will also go to DTL. There will be a hierarchy of approval and that will be differ depending upon the type of SSA holder (field, NPSU or WCO). Record will show next approver if last approver had approved the record.
13. After logging in with DTL and clicking on Human resource menu and then on SSA Renewal in main menu, a dropdown of batch will appear. User will select batch from the dropdown and then a grid will appear. Here DTL will see the comment of RTL by clicking on expand button.

    DTL will take action such as approve, reject, revert to initiator and add his/her comment. DTL can check and make changes in action by expending one by one and save the record. When all records have been edited, submit button will appear on the top and bottom of grid.

    By clicking on approve all button, status of all the records will change to approved and a submit button will appear on the top and bottom of the grid.

    Now DTL will submit approved record to the next approver. An email notification will go to the next approver and also to HR Assistance. HR can check statistics table by logging in the application.

    After submit, user cannot edit any record. Record will open in view only mode.

14. After logging in with TL and clicking on Human resource menu and then on SSA Renewal in main menu, a dropdown of batch will appear. User will select batch from the dropdown and then a grid will appear. Here TL will see the comment of RTL and DTL by clicking on expand button.

    TL will take action such as approve, reject, revert to initiator and add his/her comment. TL can check and make changes in action by expending one by one and save the record. When all records have been edited, submit button will appear on the top and bottom of grid.

By clicking on approve all button, the status of all records will change to approved and a submit button will appear on the top and bottom of the grid.

Now TL will submit approved record to the next approver. An email notification will go to the next approver and also to HR Assistance. HR can check statistics table by logging in the application.

After submit, user cannot edit any record. Record will open in view only mode.

15. After logging in with AO and clicking on Human resource menu and then on SSA Renewal in main menu, a dropdown of batch will appear. User will select batch from the dropdown and then a grid will appear. Here AO will see the comment of RTL, DTL and TL by clicking on expand button.

    AO will take action such as approve, reject, revert to initiator and add his/her comment. AO can check and make changes in action by expending one by one and save the record. When all records have been edited, submit button will appear on the top and bottom of grid.

    By clicking on approve all button, the status of all records will change to approved and a submit button will appear on the top and bottom of the grid.

    Now AO will submit approved record to the next approver. An email notification will go to the next approver and also to HR Assistance. HR can check statistics table by logging in the application.

    After submit, user cannot edit any record. Record will open in view only mode.

16. After logging in with DWR and clicking on Human resource menu and then on SSA Renewal in main menu, a dropdown of batch will appear. User will select batch from the dropdown and then a grid will appear. Here AO will see the comment of RTL, DTL, TL and AO by clicking on expand button.

    DWR will take action such as approve, reject, revert to initiator and add his/her comment. DWR can check and make changes in action by expending one by one and save the record. When all records have been edited, submit button will appear on the top and bottom of grid.

    By clicking on approve all button, the status of all records will change to approved and a submit button will appear on the top and bottom of the grid.

    Now DWR will submit approved record to the next approver. An email notification will go to the next approver and also to HR Assistance. HR can check statistics table by logging in the application.

After submit, user cannot edit any record. Record will open in view only mode.

17. After logging in with WR and clicking on Human resource menu and then on SSA Renewal in main menu, a dropdown of batch will appear. User will select batch from the dropdown and then a grid will appear. Here AO will see the comment of RTL, DTL, TL, AO and DWR clicking on expand button.

    WR will take action such as approve, reject, revert to initiator and add his/her comment. WR can check and make changes in action by expending one by one and save the record. When all records have been edited, submit button will appear on the top and bottom of grid.

    By clicking on approve all button, the status of all records will change to approved and a submit button will appear on the top and bottom of the grid.

    Now WR will submit approved record to the next approver. An email notification will go to the next approver and also to HR Assistance. HR can check statistics table by logging in the application.

    After submit, user cannot edit any record. Record will open in view only mode.

18. When the approval loop gets completed, it will get reflected in the HR screen and next tab “SSA Preparation” will be enabled.

    Here HR will see a screen where all approved SSAs are displayed. HR can process these records by using Process All option or process records one by one. After clicking process button a contract document (SSA) will be generated with new contract date and remuneration details

    Here HR can edit some information and download new SSA.

19. After processing, record will go for medical verification. Here HR will have to check yes/no checkbox button that appears in the grid and save the records.
20. After saving the medical verification, SSA is ready for dispatch.

**WCO**

21. There will be a minor variation in approval process in WCO case. The renewal request goes to TL instead of RAFO/RTL. HR assistance will create notification same as in the case of NPSU/Field and send that notification to TL. TL will get notification in application as well as by email.

    TL can decide that SSA will be short term or full term and if it is short term then TL will have to enter duration in months. TL can add remarks and save the details. After save submit button will be visible and TL will submit record to HR.

    The remaining process is same as that for Field or NPSU.

# Issuance of New SSA

SSA contracts are issued when a new SSA holder joins. A recruitment procedure is followed from the stage of vacancy announcement to actual recruitment process. For every selected candidate his/her profile is captured in a personal history form which serves as the input document for creating a SSA. An SSA is issued against a post and the location, grade, step, and other contract attributes. The contract start dates need not necessarily be beginning of a calendar year. The SSA issuance follows an approval work flow and there is also an interaction with the insurance company for the validation of medical insurance coverage. There are also some variation in the SSA issuance process for field, NPSU and WCO SSA holders.

**Work Flow for New SSA Issuance**

**Work Flow System Requirements**

1. A link will be created in the menu in HRIS under Human Resources to provide access to New SSA.
2. The issuance of a new SSA will be initiated by HR assistant.
3. HR will click on New SSA under Human Resource menu. A page will open that will have search fields for SSA id and name. On clicking on search button, data will be reflected in grid according to the search criteria.

   To add new SSA, HR will have to click on Add New SSA button. A new page will open that will have tabs for SSA Details, Address, Posting, Remuneration, Documents, Send for Approval and SSA Preview. First time, when page will load, all tabs will be in read only mode except SSA Details. There will be a panel for personal information on SSA details tab. After saving, all the

information in this panel, a new panel call SSA details will be visible. HR will have to enter all the details in Personal Information panel and SSA Details panel and save it. Once save is done all other tabs will get enabled.

On clicking on address tab, there will be two panels: permanent address and current address. After filling permanent address details, HR can check “current address same as permanent address” checkbox to copy all the details, to current address panel. Once all details will be filled by HR, HR will click on Save.

On clicking on posting detail tab, there will be a grid that will show the information of posting of a particular SSA. HR will click on add new button for adding information. On clicking on Add New button, a panel will open inside grid, In this panel, From and To date will automatically be filled as per the contract date. After filling necessary information, HR will click on Save.

On clicking on remuneration tab, there will be a grid that will show the information of remuneration of particular SSA, HR will click on Add New button for adding information. On clicking on Add New button, a panel will open inside grid in which From date and To date will automatically be filled as per the contract date. After filling necessary information, HR will click on save.

On clicking on documents tab, there will be a grid that will show the document where HR can add important documents of SSAs.

On clicking on send for approval tab, notification will go to first approver on application and by email.

4. When an approver logs in, he/she can click on New SSA under Human Resources. A page will open that will show data of new SSAs. On clicking on open button, a page will open on which all tabs will be in read-only (disabled) mode except approval. Here approvers can approve particular SSA and send to next approver. A notification will go to next approver as well as to HR by email and application.

   The hierarchy of approver chain can be changed, if needed at any time.

   After all approvers approve that particular SSA, mail notification will go to HR.

5. HR logs in using New SSA link under Human Resources menu and selects particular record that has been approved by approvers and clicks on SSA Preview tab to download SSA contract.

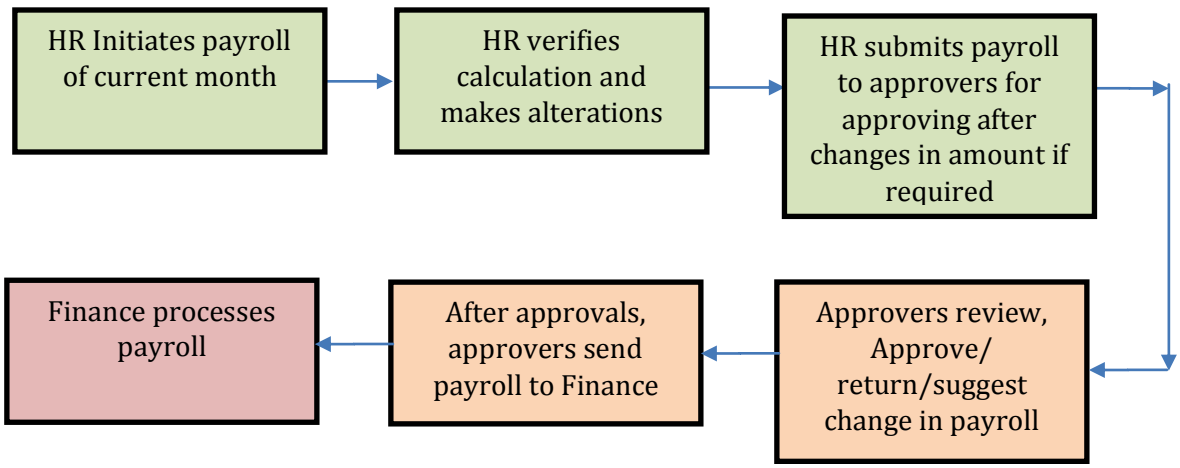

# Payroll

Payroll processing for SSA holders is done every month and initiated towards the end of the previous month. In addition to the monthly entitlement based on the grade, step and hardship allowance, provision is made for additional entitlements and deductions. Once the process is initiated, an approval by RAFO and RTL is needed at the region level. The payroll also goes through a work flow of verification and authorization at HR level and finally culminates in the form a reimbursement statement (Excel format) sent to Finance department for onward transmission to bank. There are some variations in the way payroll is processed for field, NPSU and WCO SSA holders. Flow of WCO and NPSU is same and after initiation list will be go for the HR verification and in the case of field it will be go first to RAFO/RTL for approval.

**Work Flow for Payroll Processing for Field SSA Holders**

**Work Flow for Payroll Processing for NPSU/WCO SSA Holders**

**Work Flow System Requirements**

1. A link will be created in the menu in HRIS under Payroll to provide access to Monthly Payroll.
2. The monthly payroll will be initiated by HR assistant.
3. HR will click on Monthly Payroll under Payroll menu. A page will open that will have search fields for SSA id and name. On clicking on search button, data will be reflected in grid according to the search criteria.
4. Main page of payroll will be open and a search screen will be there. If Payroll of current month has been created then it will show in grid otherwise HR will have to generate payroll of this month by clicking on Initiate “Payroll for Current Month” button. If HR clicks on this button then rows will be generated automatically for all offices (Field, WCO, NPSU) with columns for Year, Month, Office, Total SSAs, Excluded SSAs, Pending SSAs, Remuneration, HR Initiation, RTL Verification, HR Process, HR Verification, HR Authorization and Payment.
5. Any row with pink color of grid shows that step date is falling in this month and yellow color of row shows that this is the last month of SSA.
6. There will be a search feature that will have search based on year, month and office type.
7. Now HR will have to click on each office one by one and initiate payroll.
8. After clicking open button in any office the screen will display tabs for Initiation, Payroll Processing, Payroll Verification, and Payroll Authorization. To start with only Initiation Tab will be operational and all other tabs will be in read only mode.
9. HR will have to click on search to locate any SSA by a given search criteria. After searching record will come on grid. In grid there will be an option of excluding for payroll processing. HR

can exclude any record before save and initiation. Data will come automatically by calculation like salary, hardship, leave encashment, deduction. HR can add any value by entering in other addition and deduct any value by entering in other deduction. After that HR can add a comment. After doing all of this process HR will save these records.

10. When record saved, Next tab Payroll Verification will be enabled and HR will have to click on that tab for next process.
11. On this screen HR can search for records based on search criteria including the status as pending, excluded and action needed.
12. Again this grid will have same record and column like previous tab. Now HR assistance can check record one by one and save that record. After checking all records HR assistance will send that record for verification. Notification will automatically go by email as well as on application of HR verification.

**WCO/NPSU**

1. HR official logs in with verification rights and clicks on Monthly Payroll under Payroll main menu. A page will open that will show the grid showing payroll of months by office wise and also showing status of that month payroll.

   On clicking open button of the grid, a page will open that will have a search panel. On searching a grid will show with the search criteria. In this grid HR verification user will add amount in other addition and deduction amount in other deduction.

   HR verification user can endorse or return particular SSA by clicking on dropdown that is in process column in grid. Endorse means it is approved by HR and return means that SSA will goes back to HR Initiator. Also he/she can exclude any SSA.

   After doing changes HR verification user will save that record. Now HR verification user will verify payroll and finds that entire payroll has some error then HR verification user will click on Return to HR button and Payroll will go back to HR Initiator.

   When all task are performed and payroll is fine then user will click on Submit HR Authorization button, and payroll will go to HR authorization for further processing Notification will go to HR Initiator and HR authorization by email as well as on application.

   Now HR verification user will see the status of payroll on main grid and user will not be able to change anything after any type of submission.

2. HR official logs in with authorization rights and clicks on monthly Payroll under Payroll main menu. A page will open that showing a grid payroll of months by office wise and also showing status of payroll of that month.

   Clicking on open button of the grid will open a search panel. On searching a grid will reflect data according to the search criteria. In this grid User can add amount in other addition and deduct amount in other deduction textbox.

   HR Authorization user can endorse or return particular SSA by clicking on dropdown that is in process column of grid. Endorse means it is approved by HR and return means that SSA will goes back to HR Initiator. Also he/she can exclude any SSA.

   After doing changes HR authorization user will save the record. HR authorization user will verify payroll and if he/she finds that entire payroll has some error then HR authorization user will click on Return to HR button and Payroll will go back to HR Initiator.

   When all tasks are performed and payroll is fine then HR authorization user will click on Submit Finance, and payroll will go to Finance for further processing. Notification will go to HR Initiator and Finance by email as well as on application.

   Now Finance user will see the status of payroll on main grid and HR authorization user will not be able to change anything after any type of submission.

3. Finance logs in on Monthly Payroll (Fin) under Payroll main menu. A page will open that will have a grid. That grid will have office wise data and also showing all status of payroll, total remuneration; excluded SSA's and totals SSA's. That page will also have search panel, Finance user can search record by month, year and office.

   On clicking on the Open button of grid a page will open. That page will have two grids. One is for yet to be paid and will have region wise record. Another grid will be already paid section and that will be empty.

   Here Finance user will download or export Excel files of a particular office payroll which will be sent to bank for reimbursement.

   Once Finance person gets the notification from bank then finance person will click on Payment processed then second grid will be filled and that will show payment processed. An email notification will go to the HR Initiator and status will also be updated on application.

**Field**

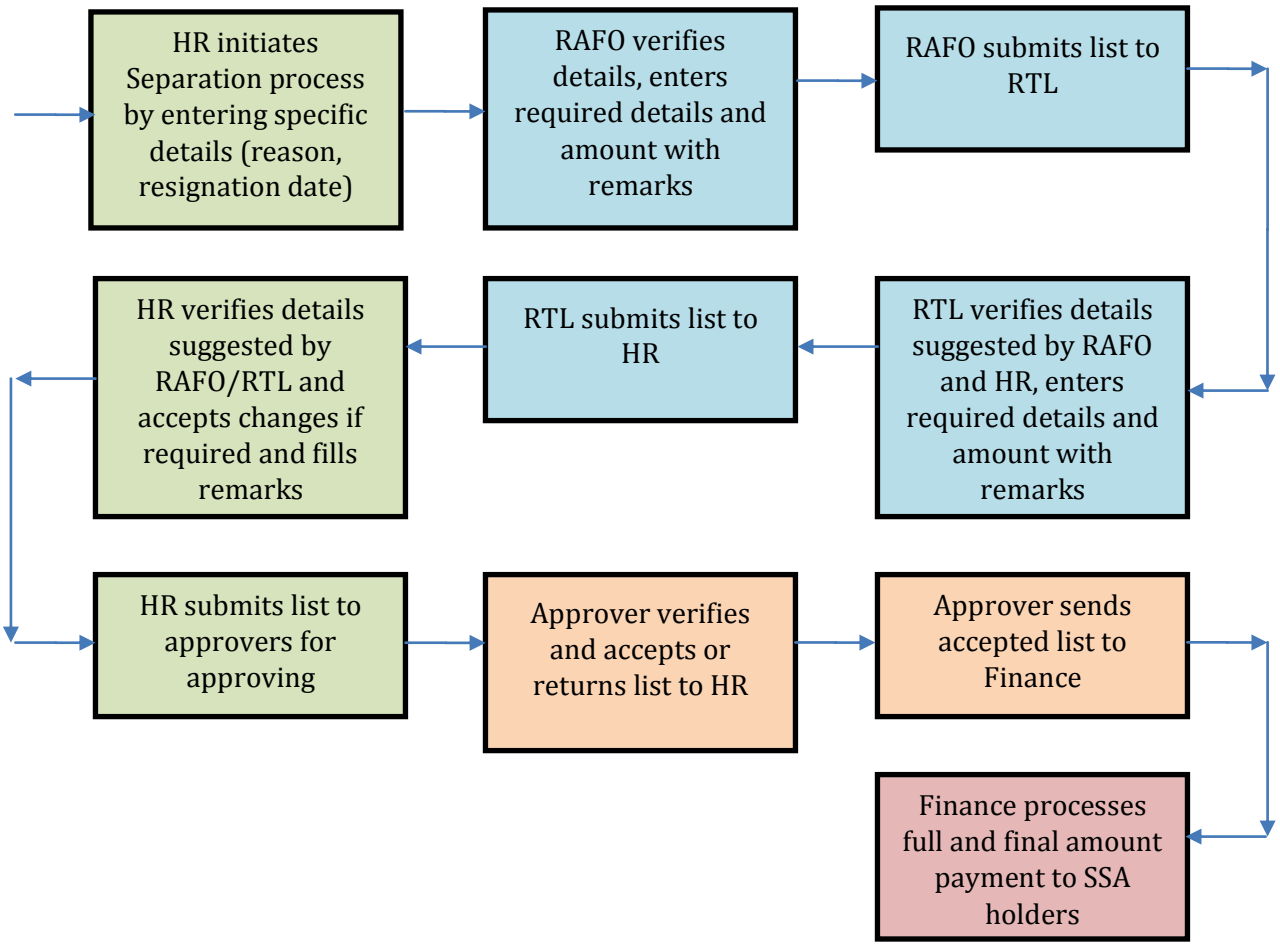

4. In case of field payroll will go to region wise RTL/RAFO first after HR initiator will initiates payroll. When HR Initiator clicks on open button of the main grid then a new tab Send to RAFO/RTL will get enabled. This tab will have the search criteria in which user can select region. After searching grid will display data and statistics of payroll. Now User can click Send to RAFO/RTL. A notification will go to RAFO/ RTL by email as well as on application to verify the payroll. HR Initiator will be able to check status of payroll response by RAFO/RTL in RAFO/RTL Response tab. Here a table will show all statistics of region wise payroll.
5. RAFO logs in and clicks Monthly Payroll menu inside Payroll Main Menu. A page will open and that will have search criteria and grid showing records of the region. It will also show status of payroll.
6. On clicking on the Open button of the grid a page will open. The page will display the records based on the search criteria.
7. RAFO can add any amounts in other addition and other deduction fields. He/she can also add remarks for a particular SSA. If someone has resigned or due to any other consideration RAFO can exclude that particular SSA. After making all changes RAFO will save record for the further processing. When all changes have been done RAFO submits payroll record to RTL. An email notification will go to RTL after submission. RAFO will not be able to change anything after submission.
8. RTL logs in and clicks on Monthly Payroll menu inside Payroll Main Menu. A page will open and again that shows records of the region and according to search criteria.
9. On clicking on the Open button, a page will open that will have search criteria and grid. Grid will reflect data according to the search criteria and region of RTL. Here RTL will see the changes done by RAFO and can make further changes, if required. RTL can also put remarks in the section and put any SSA on hold if required.
10. After all needful changes are done RTL will submit record to HR. An email notification will go to HR. RTL will not be able to change any record after submission.

    After this step, Workflow is the same as WCO/NPSU.

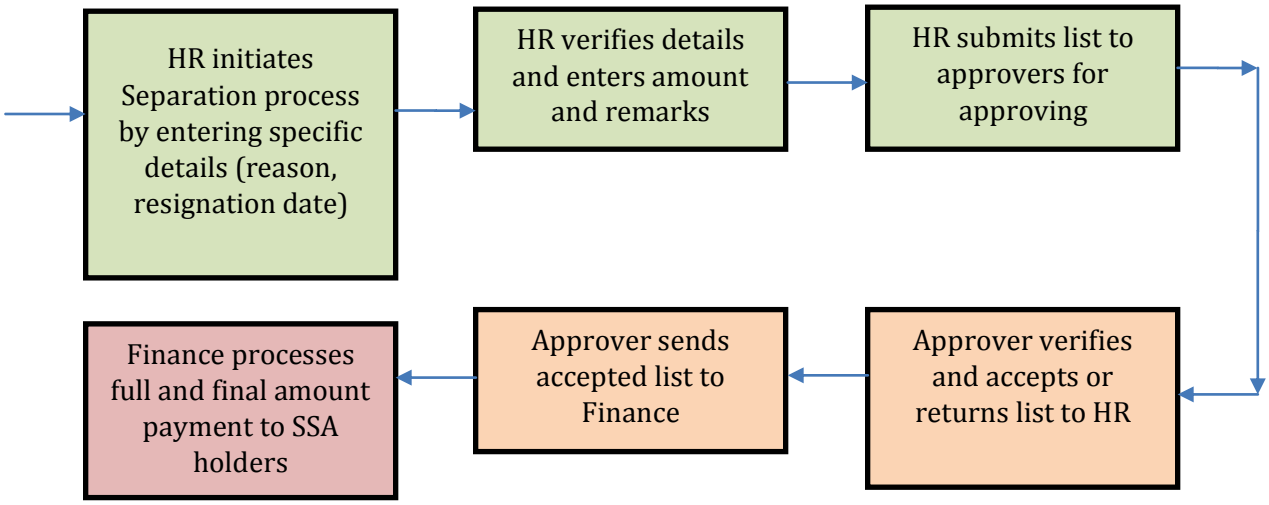

# Separation

Separation process is initiated if a person resigns, or his/her contract expires or due to some unusual situation resulting in termination of services. The separation process is initiated by HR and has to be approved by RAFO/RTL for a field based SSA holder. After a work flow of verification and authorization, the case goes to Finance for full and final settlement.

**Work Flow for Separation for Field SSA Holders**

**Work Flow for Separation for WCO/NPSU SSA Holders**

**Work Flow System Requirements**

1. HR logs in and clicks on Separation Process menu under Separation main menu. A page will open which will have generic search panel. On clicking on search button, data will be reflected in grid according to the search criteria.
2. To start separation process HR will click on Add New button and it will open a page that will have SSA Id and name in search panel. After searching with these field data will reflect in grid. HR will have an option of selecting SSAs for separation. After selecting records from grid, HR will click on add button. Now selected record will show in main grid of separation process.
3. On separation process page, there will be two buttons in grid called open and unmark. If HR will click on unmark button then that particular record will be deleted from separation grid. If HR will click on open button, then separation process will start and a new page will open. There will be three tabs on this page called Templates, Separation Details and Documents.
4. In Template tab HR can select email template and letter template. In Documents tab, HR will upload necessary documents of separation. In Separation details tab, HR will give input in Reason for Separation, Resignation date, Last working date, Notice period waived off. After giving these details, system will automatically calculate various fields and amounts. Now HR will click on Initiate Separation button, now separation process will be ready for verification.

   There will be variations in verification process that differ from office to office.

**Field**

After initiation of separation process by HR, field SSAs will go to the RAFO and notification will go by email and application.

5. RAFO logs in and clicks on F&F Process under Separation Main menu. A page will open that will have generic search criteria and grid. On clicking on open button, a page will open that will have auto-calculated fields for amounts. Automatic calculation will be done by application according to the given field of HR. Now RAFO will enter notice period served days and this value will be used by the application to generate total remuneration payable amount.

   RAFO can add his/her comments and add amount in other addition textbox and deduction amount in other deduction textbox. After verifying details, RAFO will click on Submit to RTL button. Now notification will go to RTL by email and application.

   RAFO will not be able to make any changes after submission.

6. RTL logs in and clicks on F&F Process under Separation Main menu. A page will open that will have generic search criteria and grid. On clicking on open button, a page will open that will have auto-calculated fields for amounts. Automatic calculation will be done by application according to the given field of HR. Now RTL will enter/modify notice period served days and this value will be used by the application to generate total remuneration payable amount.

   RTL can add his/her comments and add amount in other addition textbox and deduction amount in other deduction textbox. After verifying details, RTL will click on Submit to HR button. Now notification will go to HR by email and application.

   RTL will not be able to make changes after submission.

7. HR los in and clicks on F&F Process under Separation Main menu. A page will open that will have generic search criteria and grid. On clicking on open button, a page will open that will have auto-calculated fields for amounts. Automatic calculation will be done by application according to the given field of HR. Now HR will enter/modify notice period served days and this value will be used by the application to generate total remuneration payable amount.
8. HR will verify the changes of RAFO/RTL. If HR agrees with the addition and deduction amounts then HR will click on accept checkbox. On checking checkbox, amount of textboxes will be added or deducted in net payable amount. HR will click on Submit to HR Verification button. Now notification will go to HR verification by email and application.

   HR will not be able to make any changes after submission.

9. HR official with verification rights logs in and clicks on F&F Process under Separation Main menu. A page will open that will have generic search criteria and grid. On clicking on open button, a page will open that will have auto-calculated field. Automatic calculation will be done by application according to the given field of HR. Now HR will enter/modify notice period served days and this value will be used by the application to generate total remuneration payable amount.
10. HR verification official can add his/her comments and add/modify amount in other addition textbox and deduction amount in other deduction textbox. Suggested amount will be directly added or deleted in net payable amount. After verifying details, HR verification will click on Submit to HR Authorization. Now notification will go to HR authorization by email and application.

    HR verification will not be able to make any changes after submission.

11. HR official with authorization rights logs in and clicks on F&F Process under Separation Main menu. A page will open that will have generic search criteria and grid. On clicking on open button, a page will open that will have auto-calculated field. Automatic calculation will be done by application according to the given field of HR. Now HR will enter/modify notice period served days and this value will be used by the application to generate total remuneration payable amount.
12. HR authentication official can add his/her comments and add/modify amount in other addition textbox and deduction amount in other deduction textbox. Suggested amount will be directly added or deleted in net payable amount. After verifying details, HR verification will click on Submit to Finance. Now notification will go to Finance by email and application.

    HR authorization will not be able to make any changes after submission.

13. Finance logs in and clicks on F&F Process under Separation Main menu. A page will open that will have generic search criteria and grid. On clicking on open button, a page will open that will have two grids for Yet to be Paid and Already Paid. If payment is processed then data will be displayed in Already Paid grid otherwise in Yet to be Paid rid. If Finance user processes payment then he/she will click on Payment Processed. Finance user also can download or export to Excel file by clicking on respective buttons.

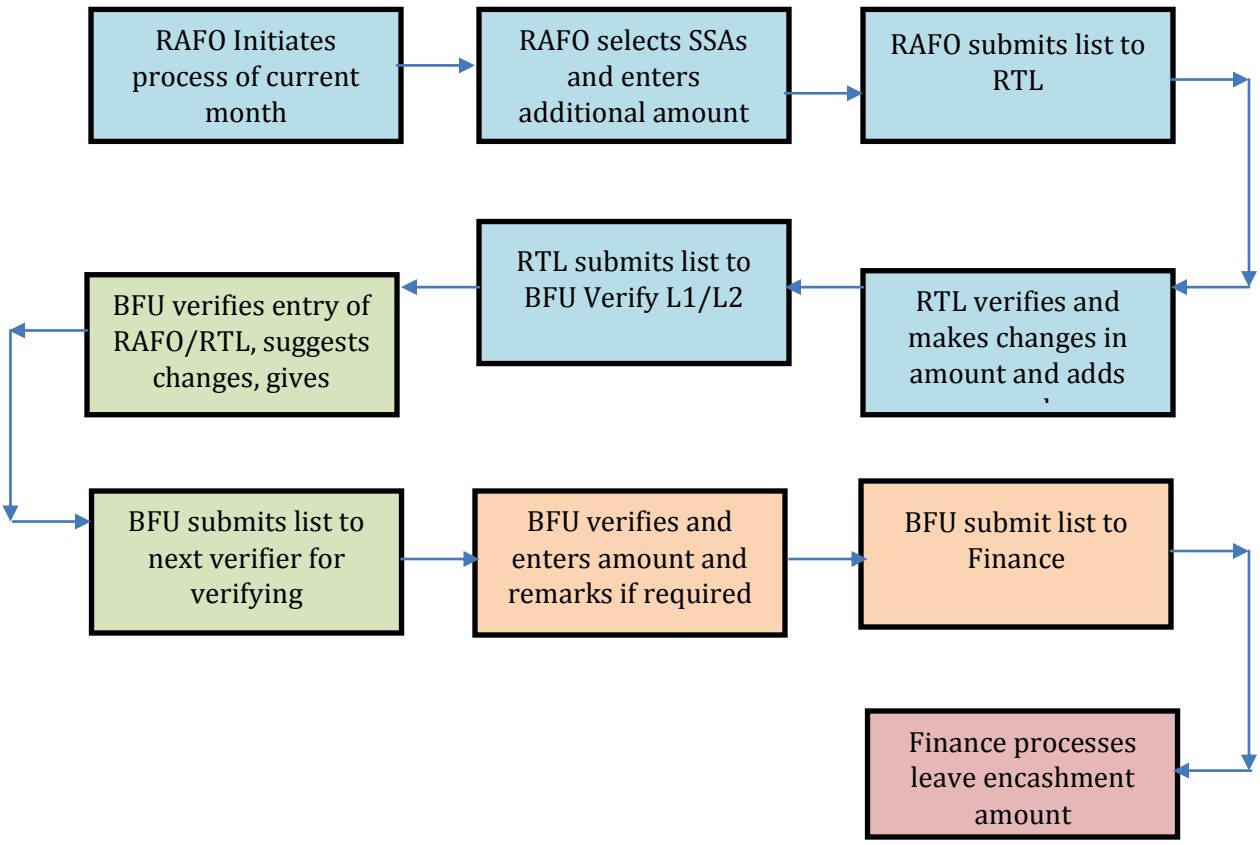

**WCO/NPSU**

When HR initiator initiates separation, HR will click on F&F Process under Separation Menu. In case of WCO/NPSU office, after initiation, process will go to HR itself.
After this, process will be same as field. HR will submit their record to HR verification, HR verification will submit their record to HR authorization and HR authorization will send record to Finance.

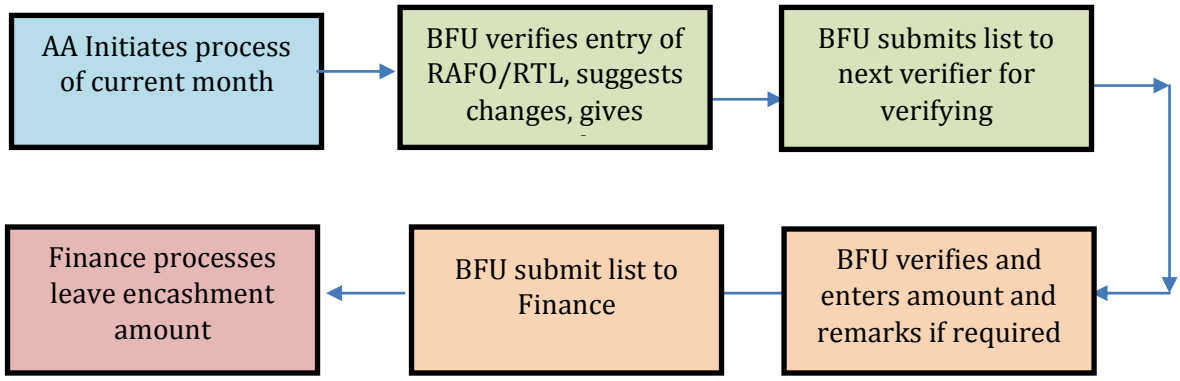

# Leave Encashment

The leave encashment facility is available for all SSA holders with left over leave at the end of their contract. Half of the left over leave can be enchased. The leave encashment process is initiated by HR for NPSU/WCO and RAFO/RTL for field level SSA holders. After due process of verification and authorization, the details are sent to Finance for payment.

**Work Flow for Leave Encashment for Field SSA Holders**

**NPSU/WCO SSA Holders**

**Work Flow System Requirements**

**Field**

1. RAFO logs in and clicks Leave Encashment menu. A page will open that will display a grid showing the history of previous Leave Encashment batches that have been processed. The grid gives a region wise count of Leave Encashment requests processed.
2. To initiate process RAFO will click on Add Batch to create a new batch for his/her region. The application will automatically create a list of SSA holders who are due for Leave Encashment in the current month. The Leave Encashment batch will include all SSA contracts completed until last month for individuals who currently hold a valid running SSA contract. Any SSA holder who has been marked for separation in HRIS before initiating the LE batch, his/her leave encashment isn't included. Further the SSA holders must have unused certified Annual Leave balance to qualify for encashment.
3. Further, all the previously excluded cases (other than F&F cases) by RAFO/RTL or by BFU will automatically appear in next batch along with comments for rejection.
4. On clicking on open button a new page will be displayed that has tabs called RAFO Initiation, RTL Endorsement, BFU Verification 1, BFU Verification 2, BFU Clearance 1, BFU Clearance 2 and BFU Payment.
5. There will be generic search criteria. The grid will be empty when the page loads for the first time. After searching, data will be reflected in the grid. Grid will have all the basic information of SSA like name, office, contact duration, last remuneration, AL, SL, leave encashment amount. RAFO can enter leave encashment amount and also enter his/her remarks. If SSA has not verified his/her bank details then a message will be shown in the remarks section.

There will be a column of Exclude in the grid for excluding a particular SSA. After filling and verifying all details RAFO can save details. Now RAFO will send details to RTL by clicking on Submit to RTL button. A notification will go to RTL by email and application. After submission RAFO will not be able to make changes.

6. RTL logs in and clicks on Leave Encashment module. A page will open that will have search criteria. According to the search criteria, data will be reflected in grid. To verify particular detail, RTL will click on open button.

   A page will open that has same tabs as RAFO screen but all will be in read only mode except RTL Endorsement. On clicking on search, data will be reflected in grid that has been processed by RAFO. RTL will verify the details of number of leave encashment days, amount and enter his/her suggestions or amount. After doing these changes, RTL will click on Submit to BFU Verification 1 button. A notification will go to BFU by email and on application. RTL will not be able to change details after submission.

7. BFU logs in and clicks on Leave Encashment module. A page will open that will have search criteria. According to the search criteria, data will be reflected in grid. To verify particular detail, HR will click on open button.

   A page will open that has same tabs but all will be in read only mode except BFU Verification 1 process. On clicking on search, data will be reflected in grid that had been processed by RTL. BFU Verifier 1 will verify the details of number of leave encashment days, amount and enter his/her suggestions or amount. After doing these changes, BFU Verifier 1 will click on Submit to BFU Verification 2 button. BFU can download or export these records to Excel file. A notification will go to BFU Verifier 2 by email and on application. BFU Verifier 1 will not be able to change details after submission.

8. BFU official for Verification2 logs in and clicks on Leave Encashment module. A page will open that will have search criteria. According to the search criteria, data will be reflected in grid. To verify particular detail, BFU Verifier 2 will click on open button.

   A page will open that has same tabs but all will be in read only mode except BFU verification2. On clicking on search, data will be reflected in grid that had been processed in previous steps. BFU Verifier 2 will verify the details of number of leave encashment days, amount and enter his/her suggestions or amount. After doing changes, BFU Verifier 2 will click on Submit to BFU Clerance 1 button. BFU Verifier 2 can download or export records to Excel file anytime. A notification will go to BFU Clearance 1 by email and on application. BFU Verifier 2 will not be able to change details after submission.

9. BFU Clearance 1 official for authorization logs in and clicks on Leave Encashment module. A page will open that will have search criteria. According to the search criteria, data will be reflected in grid. To verify particular detail, BFU Clerance 1 official will click on open button.

   A page will open that has same tabs as in previous steps but all will be in read only mode except BFU Clearance 1. On clicking on search, data will be reflected in grid that had been processed in previous steps. BFU Clearance 1 will give clearance the details of number of leave encashment days, amount and enter his/her suggestions or amount. After doing changes, BFU Clearance 1 will click on Submit to BFU Clearance 2 button. BFU Clearance 2 can download or export records to Excel file anytime. A notification will go to BFU Clearance 2 by email and on application. BFU Clearance 1 authorization will not be able to change details after submission.

10. BFU Clearance 2 official for authorization logs in and clicks on Leave Encashment module. A page will open that will have search criteria. According to the search criteria, data will be reflected in grid. To verify particular detail, HR authorization official will click on open button.

    A page will open that has same tabs as in previous steps but all will be in read only mode except BFU Clearance 2. On clicking on search, data will be reflected in grid that had been processed in previous steps. BFU Clearance 2 will give clearance to the details of number of leave encashment days, amount and enter his/her suggestions or amount. After doing changes, BFU Clearance 2 will click on Submit for Payments 2 button. BFU Clearance 2 can download or export records to Excel file anytime. A notification will go to BFU by email and on application. BFU Clearance 2 authorization will not be able to change details after submission.

11. BFU (Payments) logs in and clicks on Leave Encashment (Fin) module. A page will open that will have search criteria. According to the search criteria, data will be reflected in grid. To verify particular detail, BFU will click on open button.

    Finance will process the payments. Finance can download or export records to Excel file at anytime. Finance can also export the data for bank advice.

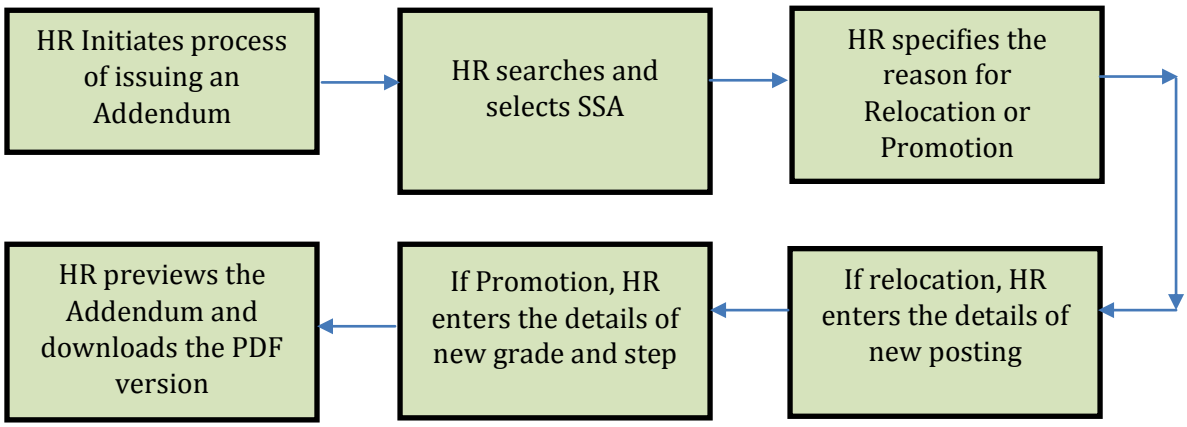

**WCO/NPSU**

In case of WCO/NPSU office, process will be initiated by AA. The rest of the steps are same as for field.

# Addendum

Addendum to an existing SSA is required if the SSA holder is relocated to a new location or if he/she is promoted. The process will be started by HR. HR will use this module when any SSA holder is to be relocated or promoted.

### Work Flow for Addendum

### Work Flow System Requirements

1. HR logs in and clicks Addendum menu under Human Resource main menu. A page will open that will have generic search criteria. HR will use the any search criteria such as SSA Id to search the SSA holder who is to be relocated or promoted. The searched record will get displayed in the grid.

2. The grid will have columns for SSA ID, Name, Designation, Office Name, Region, Duty Station, Grade, Expiry and Action. On clicking on Open button, a page will open that will have four tabs, for SSA Details, Posting, Remuneration and Addendum Preview.

3. At first only SSA Details tab will be enabled and visible. The tab will display basic information of the SSA.

4. HR will specify the Reason of Relocation/Promotion, Effective Date, Addendum Date. After submitting these details, all tabs will get enabled and SSA Details tab will be in read only mode.
5. In case the SSA holder is to be relocated, HR will open the Posting tab where the current posting details will be displayed. These details can be edited to enter the new details of the posting. The information to be entered will be From and To Dates, Office, Region, Sub Region, Unit, Duty Station, State and City.

6. In case of Promotion, HR will open the Remuneration tab where the current remuneration details will be displayed. These details can be edited to enter the new details after promotion. The information to be entered will be From and To Dates, Grade, Step and Reason. The monthly remuneration will be calculated and displayed.

7. The Addendum document will be created automatically when the information is saved. To preview and download the PDF document for the Addendum HR can open the Addendum Preview tab

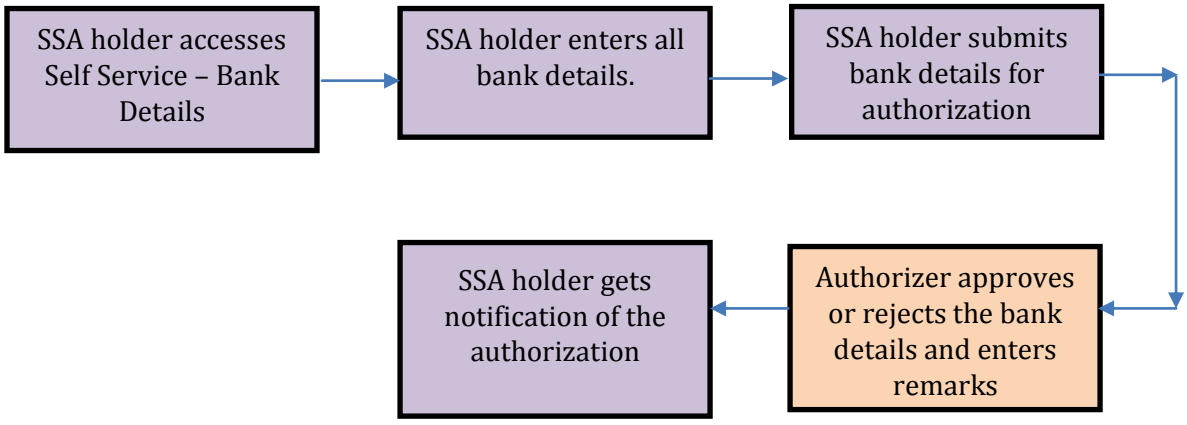

# Self Service

This module will be used by SSA holders for availing self services. The services that can be availed include Bank Details, Leave Balance Certification, Report Non Receipt of Payment, Exit Interview, Separation and Remuneration Slip. To access Self Service, the SSA holder logs in and clicks Self Service in the main menu which will open the sub-menus available for self services.

### Bank Details

All SSA holders are required to submit their bank account details to HR and Finance so that their payments such as salary can be transferred electronically. The Bank Details option allows SSA holders to furnish their bank account details.

### Work Flow for Bank Details

### Work Flow System Requirements

1. SSA holder logs in and clicks Bank Details sub menu of the Self Service main menu. A page will open that has input fields for entering the bank details. The information that needs to be specified is IFSC Code, Bank Name, Beneficiary name and Account Number. The bank Branch name will be filled up automatically based on the IFSC code. The user is also supposed to upload

the scanned copy of a cancelled cheque. The details once entered will be submitted for authorization.

2. An email notification will be received by the authorizer. The authorizer depends upon the designation of the SSA holder. For certain designations, the authorization is done by the RAFO while for senior positions it is done by RTL. In case of RAFO or RTL, the authorization will be done by HR.

3. Authorizer (HR, RAFO, RTL) logs in and clicks Bank Details Verification sub-menu under Authorization menu. A page will open that will have search criteria. The Authorizer will use the any search criteria such as SSA Id to search the SSA holder whose bank details need to be authorized. The searched record will get displayed in the grid.

4. The grid will display columns for SSA No, Name, Region Name, Duty Station, Designation and Status. On clicking on Open button, a page will open that will be in read only mode and having all the bank details filled by the SSA holder. Authorizer can click Verified button for verifying the details or click Reject button for rejecting details. An email notification will go to the SSA holder.

**Leave Balance Certification**

All SSA holders can certify their leave balances. The Leave balance certification option allows SSA holders to certify their leave balances.

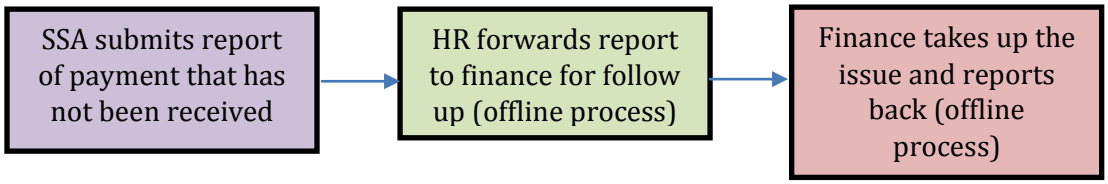

**Work Flow System Requirements**

1. SSA holder logs in and clicks Leave Balance Certification sub menu of the Self Service main menu. A page will open that displays the duration of contract and count of remaining leave of all types. There will be a Check Box for verifying. If all the leaves are ok, user can check the Check Box to accept and submit. After submitting, user can print these details.

### Report Non Receipt of Payment

If for any reason a SSA holder doesn't receive a payment such as salary into his bank account, he or she can submit a report of non-receipt of payment to HR for follow up with finance.

### Work Flow for Bank Details

### Work Flow System Requirements

1. SSA holder logs in and clicks Report Non Receipt of Payment sub-menu under Self-Service main menu. A page will open that will show a grid that gives a list of previous reports. The grid will have columns for Bank Account Last Checked On (date), Month, Year, Requested Date and Status. To add a new reporting the SSA holder can click Add Request button.
2. On clicking Add Request button a page will open where the SSA holder can enter Date on which he/she Checked the Bank Statement, the Month and Year of Salary which was not received and submit to HR. A notification will then go to HR and the status will be requested.
3. The request will be processed offline by referring it for action by Finance. The outcome will be sent directly to the SSA holder using an offline process.

### Exit Interview

All SSA holders have to fill up a questionnaire that serves as Exit Interview upon separation from the organization. HRIS provides a feature for submitting the Exit Interview questionnaire online.

### Work Flow System Requirements

1. SSA holder logs in and clicks Leave Exit Interview sub menu of the Self Service main menu. A page will open that displays the Exit Interview questionnaire. The information that needs to be entered includes Reason for Leaving and Date of Last Working Day.

2. SSA Holder can then enter the descriptive text as per the Exit Interview template and submit it to HR.

### Separation

All SSA holders have to provide Contact Information for Future Correspondence upon separation from the organization. HRIS provides a feature for submitting this information online.

### Work Flow System Requirements

1. SSA holder logs in and clicks Leave Separation sub menu of the Self Service main menu. A page will open where the SSA holder specifies when Last Remuneration was received for the Month and the date of Last Per Diem Received.

2. SSA holder then fills up details of the Contact Address for Future Correspondence that includes Address, Country, State, City, Post Office and PIN Code and submits it to HR.

## Remuneration Slip

All SSA holders can request for the issue of a Computer Generated Remuneration Slip online.

## Work Flow System Requirements

1. SSA holder logs in and clicks Remuneration Slip sub menu of the Self Service main menu. A page will open where the SSA holder specifies the Month and Year for which the Remuneration Slip is required and click Generate Slip button. The PDF version of the slip gets generated which can then be downloaded.

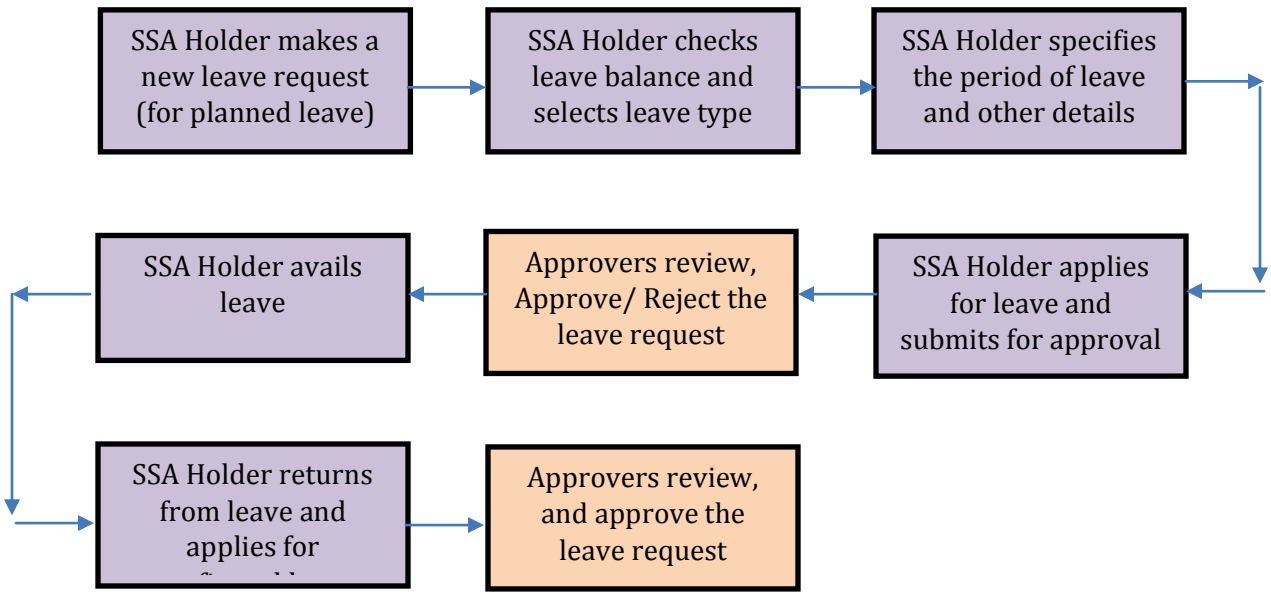

# Leave Management

The Leave Management module will provide a platform for SSA holders to apply for leave online driven by an approval workflow according to prevailing HR guidelines. Broadly speaking, this module provides the following facilities to the SSA holders:

1. Apply for planned leave online.
2. Allow approver to review the leave request and approve or reject it.
3. Apply for confirmed leave after returning from the leave break.
4. Allow approver to approve the confirmed leave.
5. View leave records and leave balance at any time.
6. View leave dashboard according to the access rights.

### Applying and Cancelling Leave

### Work Flow for Leave Application

**Work Flow System Requirements**

1. SSA holder logs in and clicks Apply for Leave sub menu of the Leave Management main menu. A page will open that displays a grid listing all previous Leave Records. The columns displayed are for Leave Type, Start Date, End Date, Days, Leave Status, Approved By and Leave Title.

2. SSA holder can search leave records by specifying search criteria such as Leave Type, Start and End Date and Leave Status.

3. To make a new Leave Request the SSA holder will click Leave Request button. This will open a page that serves as a panel for online leave application.

4. The panel will display the Leave Balance for various leave types, Name of the SSA Holder, Name of the Supervisor, Contract Start and End Dates.

5. The SSA holder will select Planned or Confirmed Leave: When one applies for a leave in advance, Planned Leave will be selected and if a request for leave is made after the absence has occurred Confirmed Leave will be selected.

6. The SSA holder will choose Type of Leave. The Leave Types available are for Annual, Sick, Maternity, Paternity, Compensatory and Special Leave without Pay. Each Leave Type will follow a different work flow for approval. Maternity Leave will apply to only female SSA holders. Male SSA holders will be entitled to Paternity Leave. For Compensatory Leave the SSA Holder will have to specify the Event that he or she had to attend against which the Compensatory Leave is availed and also the Event Start and End Dates. For Maternity Leave, the SSA holder will have to specify the Single Child Birth or Multiple Child Birth as the case may be. For Paternity Leave the SSA holder will have to specify the Date of Birth of the Born Child.

7. The SSA holder will specify the Start and End dates, Start and End time (First Half or Second Half). The number of days for the leave will be computed automatically taking into account official holidays and weekdays applicable to the Duty Station where the SSA holder is posted. For Planned Leave a back date can't be entered and similarly for Confirmed Leave a future date can't be entered. Recurring Half Days can also be taken over a period.

8. Additionally, the SSA holder will enter Remarks, Contact Number during the leave of absence and Backup Staff during the leave of absence.

9. For certain leave types it will be required to Attach Support Documents. For Sick Leave of more than 3 days it will be mandatory to attach a medical certificate. For Maternity Leave it will be mandatory to attach SEARO/RSP certificate. For Paternity Leave it will be mandatory to attach the Birth Certificate of the child.

10. Once all the required information in the Leave Request will be entered, the SSA holder will click Apply for Leave to submit his/her Leave Request for approval by the supervisor or other competent authorities. A notification will be sent to the Approver to review and approve the Leave Request. The Leave Request record will get listed in the grid and the Status will show Requested.

11. The SSA holder will be able to view the details of his/her leave Request and Modify or Cancel it as along as the Request isn't approved by the Approver. If the Leave Request is Approved, then also the SSA holder will be able to Cancel it. In this case another notification will be sent to the Approver to Approve the Cancellation Request. The Days for Leave will be rolled back in case of cancellation.

12. SSA holder will apply for Confirmed Leave if he or she has joined office after availing Planned Leave that has been approved by the Supervisor. The SSA holder can modify the leave dates, if required. SSA holder will also apply for Confirmed Leave if he or she joins office after availing leave without applying for it. In this case he or she will apply for back dated leave. The Confirmed Leave will also require approval by the supervisor. If the Supervisor doesn't approve a Confirmed Leave Request within 7 days, then the request will be Auto-Confirmed.

**Approving Leave**

**Work Flow System Requirements**

1. Whenever any SSA holder will apply for leave, his/her Supervisor will receive an email notification. To Approve any Leave Request the Supervisor logs into HRIS and clicks the Approve Leave sub-menu of the Leave Management menu. A page will open that displays a grid listing all Leave Requests. The columns displayed will be for SSA Holder Name, Leave Type, Start Date, End

Date, Requested Date, Duty Station and Leave Status. The Supervisor can search Leave Request by specifying search criteria such as Leave Type, Start and End Date and Leave Status.

2. To Approve any Leave Request the Supervisor will click the Edit icon to open the Leave Request. After reviewing the Request, the Supervisor will enter his/her remarks and then Approve or Reject the Leave Request. A notification will be sent to the SSA holder about the Approval. Certain leave Types require multiple levels of Approving. In this case a Notification will be sent to next Level of Approver.

3. The higher Level Approvers will follow the same process to Approve or Reject the Leave Request. For Multi-Level Approval, the Leave Request will be considered Approved when it is approved at all levels.

4. Annual, Sick and Paternity Leave will be approved by the Supervisor of the SSA Holder. Compensatory Leave will be first Endorsed by the Supervisor and then Approved by the RTL. Maternity Leave will first be endorsed by the Supervisor and then endorsed by HR (as per approval from RSP). Special Leave without Pay Approval will follow a multi-level Approval workflow with variations in the Approval Matrix depending upon the designation, reporting office and location. The table below gives the Approval Matrix for various SSA holder types:

| Office | SSA Type | Level 1 | Level 2 | Level 3 | Level 4 | Level 5 |
|---|---|---|---|---|---|---|
| Field | Admin SSA | Supervisor<br>Endorse<br>Reject | RAFO<br>Endorse<br>Reject | RTL<br>Endorse<br>Reject | HR<br>Recommend<br>Not Recommend | AO<br>Approve<br>Reject |
| | Medical Officer SSA | Supervisor<br>Endorse<br>Reject | OSD<br>Endorse<br>Reject | RTL<br>Endorse<br>Reject | HR<br>Recommend<br>Not Recommend | TL/NPSP<br>Approve<br>Reject |
| NPSU | NPSU SSA | Supervisor<br>Endorse<br>Reject | HR<br>Recommend<br>Not Recommend | TL/NPSP<br>Approve<br>Reject | | |
| WCO | WCO SSA | Supervisor<br>Endorse<br>Reject | HR<br>Recommend<br>Not Recommend | D-WR<br>Approve<br>Reject | | |

In case any of the Authority at level 2 and above also happens to be the Supervisor then his/her approval step will be bypassed.

### HR Leave Functions

HR will have special access to Leave Management to perform certain functions that include Record Leave, View Record Leave, Offline Leave and Duty Travel:

### Work Flow System Requirements

1. Whenever HR needs to perform special Leave management Functions, HR logs into HRIS and clicks the Leave Management menu. A sub-menu of Leave functions available to HR will be displayed and HR can choose any one.

2. To Record Leave of any SSA Holder HR will click the Record Leave sub-menu. A page will open that displays a grid listing all SSA holders. The columns displayed will be for SSA No., Name, Designation, Region, Sub Region, Unit, Contract Start and Contract End. HR can search leave records by specifying search criteria such as SSA Id. and Name. To Record Leave for any SSA Holder the HR will click Add Leave button. The Leave Request panel as described earlier will open and HR can record leave of any type. The Leave Request will have to go through the regular work flow of Approval depending upon the Type of the Leave.

   To view the Leave Records added by HR, HR will click on View Record Leave sub menu. A page will open that displays a grid listing all Leave Records made by HR. The columns displayed will be for Name of the SSA Holder, Leave Type, Start Date, End Date, Request Date, Duty Station and Leave Status. HR can search leave records by specifying search criteria such as Leave Type, Start Date, End Date, Name of the SSA Holder and Leave Status. To view the Record Leave for any SSA Holder the HR will click the record.

3. HR can also record Offline Leave. This feature will be required for WHO staff (other than SSA holders) and will be used to record their leave so that a notification mail can be sent out all staff with a list of staff members on Leave on a particular day. To record Offline Leave, HR will click Offline Leave sub-menu. A page will open that displays a grid listing all staff members. The columns displayed will be for Staff Name, Leave Type, Start Date, Start Day Time, End Date, End Day

Time, Unit and User Type. HR can search leave records by specifying search criteria such as Leave Type, User Type, Start Date, End Date and Entry Date. To add a new Offline Leave Record, HR will click Add Leave. A form will open that will allow HR to enter the details of the Leave. The information to be entered will include Office, Staff Name, Start Date, Start Time, End Date, End Time, Type of Leave, Backup Staff and Reason/Purpose. The Number of Days for Leave will be computed and displayed. The Offline Leave will get recorded when HR saves the record. Once all Offline Leave entries for the day have been made, HR can mail the list to all staff members using the Send Mail button in the grid page.

4. HR can also record Duty Travel details for the day. This feature will be required so that a notification mail can be sent out to all staff with a list of staff members on Duty Travel on a particular day. To record Duty Travel Details, HR will click Duty Travel sub-menu. A page will open that displays a grid listing staff members on Duty Travel. The columns displayed will be for Name, Unit, Start Date, End Date and Place. HR can search leave records by specifying search criteria such as Start Date and End Date. To add a new Duty Travel detail, HR will click Add Duty Travel. A form will open that will allow HR to enter the details of the Duty Travel. The information to be entered will include Type of Staff (SSA Holder or GSM), Office, Staff Name, Start Date, End Date, From Time, To Time, Place, Backup Staff and Purpose. The Duty Travel details will get recorded when HR saves the record.

## Document Management System

Document Management Module is a platform for creating and managing a Document Repository for all the SSA Holders. Documents in HR process get created for all SSA holders by different stakeholders that include the SSA Holder, RTLs/RAFOs and HR team. The access to the documents is governed by Document Category and Type and also by the user roles.

**Document categories and Access Rights**

## Performance Management and Development System (PMDS)

Performance Management and Development System (PMDS) is a platform for creating and managing Performance Assessment of all SSA Holders. Performance Assessment is done at Begin Term, Mid Term and End Term for all SSA holders by their First Level and Second Level Supervisors. RTLs/RAFOs and HR team can view the PMDS module for each SSA Holder.

## Data Schema

| Module: Master | | | | | |
|---|---|---|---|---|---|
| **Table: ActivityMaster** | | | | | |
| **COLUMN NAME** | **COLUMN DEFAULT** | **IS NULLABLE** | **DATA TYPE** | **MAX LENGTH** | **DESCRIPTION** |
| Id | NULL | NO | int | NULL | Id is auto increment column used for unique id of Activity |
| Activity | NULL | YES | varchar | 50 | Activity is used to define different activities of application |

| Module: Master | | | | | |
|---|---|---|---|---|---|
| **Table: AddressMaster** | | | | | |
| **COLUMN NAME** | **COLUMN DEFAULT** | **IS NULLABLE** | **DATA TYPE** | **MAX LENGTH** | **DESCRIPTION** |
| Id | NULL | NO | int | NULL | Id is auto increment column used for unique id of Address |
| Address | NULL | YES | nvarchar | -1 | This column contains address |
| AddedBy | NULL | YES | int | NULL | This is used for the name of person who added address |
| AddedDate | (getdate()) | YES | datetime | NULL | Address added date |

| Module: Master | | | | | |
|---|---|---|---|---|---|
| **Table: BankMaster** | | | | | |
| **COLUMN NAME** | **COLUMN DEFAULT** | **IS NULLABLE** | **DATA TYPE** | **MAX LENGTH** | **DESCRIPTION** |
| Id | NULL | NO | int | NULL | Id is auto increment column used for unique id of Bank |
| Name | NULL | YES | varchar | 150 | This is used for Bank Name |
| Short Name | NULL | YES | varchar | 150 | This is used for Bank short code |
| IsActive | NULL | YES | bit | NULL | Is this bank name is active or not |
| AddedBy | NULL | YES | int | NULL | This is used for the name of person who added Bank Name |
| AddedDate | (getdate()) | YES | datetime | NULL | Bank added date |
| IsOverseasBank | NULL | YES | int | NULL | If the bank is an overseas one |

| Module: Master | | | | | |
|---|---|---|---|---|---|
| **Table: CategoryTypeMaster** | | | | | |
| **COLUMN NAME** | **COLUMN DEFAULT** | **IS NULLABLE** | **DATA TYPE** | **MAX LENGTH** | **DESCRIPTION** |
| CategoryId | NULL | NO | numeric | NULL | Id is auto increment column used for unique id of Category |
| CategoryDescription | NULL | YES | varchar | 50 | This column is used for category Description |
| CategoryName | NULL | YES | varchar | 50 | This column is used for category Name |
| HRUpload | NULL | YES | int | NULL | This column is used if HR Can upload document category or not |
| HRView | NULL | YES | int | NULL | This column is used if HR Can View document category or not |
| SSAUpload | NULL | YES | int | NULL | This column is used if SSA Can Upload document category or not |
| SSAView | NULL | YES | int | NULL | This column is used if SSA Can View document category or not |
| RAFOUpload | NULL | YES | int | NULL | This column is used if RAFO Can Upload document category or not |
| RAFOView | NULL | YES | int | NULL | This column is used if RAFO Can View document category or not |
| BFUUpload | NULL | YES | int | NULL | This column is used if BFU Can Upload document category or not |
| BFUView | NULL | YES | int | NULL | This column is used if BFU Can View document category or not |
| SUPUpload | NULL | YES | int | NULL | This column is used if Supervisor Can Upload document category or not |
| SUPView | NULL | YES | int | NULL | This column is used if Supervisor Can View document category or not |

| Module: Master | | | | | |
|---|---|---|---|---|---|
| **Table: CityMaster** | | | | | |
| **COLUMN NAME** | **COLUMN DEFAULT** | **IS NULLABLE** | **DATA TYPE** | **MAX LENGTH** | **DESCRIPTION** |
| CityId | NULL | NO | int | NULL | Id is auto increment column used for unique id of City |
| CityName | NULL | YES | varchar | 250 | This is used for City name |
| StateId | NULL | YES | int | NULL | This is used for State Id |
| Hardship | NULL | YES | bit | NULL | Is this city is in hardship location |
| CityCategory | NULL | YES | char | 2 | Category Of city |
| AddedBy | NULL | YES | varchar | 250 | City Added by |
| AddedDate | NULL | YES | date | NULL | City Added Date |
| UpdatedBy | NULL | YES | varchar | 250 | City Updated by |
| UpdatedDate | NULL | YES | date | NULL | City Updated date |
